Mullion Framing Section

Performance

Permits Wide Opening

Creates an internal support for widening of an opening. This can create additional walk-through space with fitting of an extra door leaf.
Permits lateral doorset extension beyond standard 2700mm width.

Let the Light In

The space alongside the door is an opportunity for natural lighting to pass through for a distinctive architectural feature to the door.

Easily Removable

The Mullion component is easily removed in the event of large goods being transported through.

Options & Details

With Door Leaf

With Glass Sidelight
